Descriptif :

ACIER pour travail à Froid 42CD4

Acier à haute resistance mécanique et à hate tenacité en état trempé et revenu, capacité de trempe par induction.

Utilisation

Construction mécanique, pièces de machines, axes, bielles, vilebrequins, arbres de transmission, pignons, plaque de base.

Etat à la livraison

Recuit à 241HB (max 820?N/mm2) possibilité de trempe en interne: nous consulter

Traitement thermique

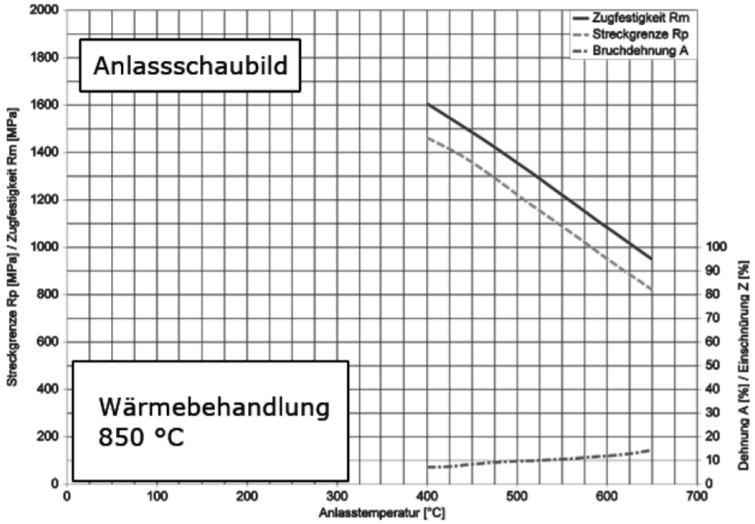

Recuit 840 - 880°C

Recuit d'adoucissement 680 - 720 °C

Trempe 820 - 880 °C

Refroidissement huile ou aire

Revenu 540 - 680°C
